PREFATORY NOTE

CHINESE AND JAPANESE ENAMELS IN THE OWRE COLLECTION

At first thought it would seem a paradox that Dr. Owre, son of the northernmost city of the world, with the blood of the vikings in his veins, should turn for his chief artistic inspiration to an art distinctively Oriental. Yet a little study of "the ware of the seven precious things" reveals in rich measure a quality fundamental to all true art—the struggle for perfection, to attain which no efforts were too great, no search too long. In this dauntless spirit of the Oriental artists, who had to battle with the almost insuperable difficulties of unplastic materials, lay the first appeal to the interest of the young technical student, himself struggling toward perfection of technique. Even as a boy in Kristiania, Dr. Owre became deeply interested in the fine work of the Norwegian enamelers. From this, it was but a step to the larger field of the Oriental workers in shippo. Out of the interest in cloisonné, at first largely scientific, grew a fondness for the art as the crowning expression of the eastern mind and heart. This slowly, in Dr. Owre's years of travel through Europe and the Orient, took visible shape in the present collection. These 1134 pieces, probably the largest number ever brought together, represent the evolution of Oriental enameling from the earliest crude work of the Ming period to the exquisite modern work of Yasuyuki Namikawa of Kyoto.

It is a curious fact that many of the rarer pieces in the collection were unearthed in Europe. The Paris exhibitions of 1868-73 first lured these treasures from the Orient; after this they found their way into various European shops, museums and private collections. Many other specimens were dug up in Dr. Owre's walking tours throughout the way districts of Europe and Japan. Still others were acquired at auction, chiefly in London. Portions of the Bowes and Alma-Tadema collections, and the greater part of the MacLean col-

lection from the Fitzwilliam Museum at Cambridge, were purchased at public sale. The fascinating covered box for the tea ceremony (No. 587) was perhaps the most treasured of Sir Laurence Alma-Tadema's pieces. The great imperial ice-chest (No. 745) came into Dr. Owre's collection as a single purchase in London. The large kylins were bought in Peking, almost out of the temple.

In running down the pieces on which he had set his heart, Dr. Owre naturally enough met with many unique experiences. Once in Liverpool, after negotiating successfully for two good-shaped Ming altar vases, Dr. Owre found that (with the collector's usual indifference to things earthly) he had come with no money save the price of his ticket to New York. The wary dealer refused to hold the coveted vases. In the year which passed before Dr. Owre's last crossing, they were sold and taken to a country village, but Dr. Owre, undaunted, followed them to the new owner and coaxed them from him at a redoubled price.

The lovely plaque of Fuji, with the other seventy odd specimens of wireless cloisonné, was bought in the studio of the artist, Sosuke Namikawa, of Tokyo, from the artist's son. As it was among the earliest of his father's work he was loath to let it go. It was eight years before Dr. Owre won his consent to a sale. The charming brown screen, decorated with storks and bamboo, and about forty other pieces were obtained from Yasujuki Namikawa in person, at his studio garden in Kyoto. Visits such as this to the studio and marvelous garden of the artist, bringing home as they did the fine spiritual quality and the exquisite artistry of the Japanese craftsman, Dr. Owre counts among his happiest experiences. And to us who view this collection of a lifetime, what message does it bring?

We see at once that it is primarily the collection of a student-connoisseur. Its many rare examples of both Chinese and Japanese enamels take us through the whole gamut of the history of Oriental enameling on metal.

We see that in the Japanese pieces especially, since here we may follow it in its modest beginnings as represented in the various small enameled objects of Seventeenth Century date in which this collection

is so rich. And we may say, at the start, that no such early Japanese enamels could be found today either in the shops of European dealers or those of Japan itself. This collection makes it possible for us to trace the art of the Japanese enameler through the following phase, the Eighteenth century phase, made possible by the discovery of the technique of Chinese cloisonné; through the glowing Chinese-inspired enamels of the Middle Nineteenth Century and, finally, to witness its perfecting in the secret processes of the Namikawa of Kyoto and Tokyo.

Before 1838, when Kaji Tsunekichi discovered the Chinese method of cloison work on a large scale, very little was attempted in Japan in the way of enameling. The few objects produced during the Seventeenth Century, and possibly, during the last quarter of the Sixteenth Century, were very small and made for Hideyoshi's Momayama Palace or for the more influential daimio of the days of Hideyoshi, Hideyori and Ieyasu. The Owre collection has a number of these early enamels, a number bearing the *mon* or crest of the famous Taiko, and which may well have been used in the Golden Palace at Fushimi. Korean artists were engaged upon this "Palace of Pleasure" at Fushimi we know, and it may well be that once again the poor, abused but ever artistically prepared Koreans of an earlier day came to the assistance of the Japanese, to whom they had revealed Art centuries before. Such objects consist of small utensils—water-holders, *kodzuka*-handles and *netsuke*—many bearing the crest of the house of the Taiko Hideyoshi (1536-1598). This collection has also representative examples of the enamel-work of Dônin (Hirata), the first to make use of this medium in sword-furnishings, especially *tsuba* and *kodzuka*. Dônin served Ieyasu, and was at work as late as 1646.

To show at its best the second phase in the style of Japanese enamel-work (*shippo*), Mr. Owre gathered together a representative collection of the brilliant Chinese enamels. This second collection, as it were, ranges in date from Ming days to the reign of Chien-lung. And of these the splendid *koros*, the great archaic-formed jar and that rarely beautiful ice-chest which served to chill the heat-laden winds of a Peking summer's-day for the poetizing Chien-lung, might well have served as inspirations to the Japanese craftsmen.

There follow almost immediately the many Japanese enamels influenced by these glowing Peking cloisonnés, until finally we come to the abandonment of the Chinese inspiration and see a desire for enamel-work in the style of Japan, as visioned by such an artist as Namikawa of Kyoto, or the beautiful monochromes of the enamel schools of Nagoya and Tokyo.

The secret of the whole art of enameling is here before you. Here are at once rare and beautiful examples of the three essential phases of the art: *champlevé*, *cloisonné* and painted enamels.

Here are the *champlevé* enamels of sober tones revealing the power of the *chajin* or tea-masters, those remorseless sticklers for good taste. Beyond are the more colorful yet still subdued enamels of the epoch of Kaji, the more pronounced color phase which followed the Chinese tradition and, finally, such a vision of softness as Namikawa's "Fuji and its Cloud Diadem," if we may so name it, the very perfection of the art.

It is a broad and clear track which connects the history of Oriental enameling with that of Byzantium, Rome, Alexandria and Thebes of four thousand years ago! Yet it is too long a journey for one short preface. Dr. Owre has performed at once a service to the student, a boon to the collector of Oriental art and a unique opportunity to those possessing a taste for the beautiful and decorative.

CONDITIONS OF SALE

1. **Any bid** which is merely a nominal or fractional advance may be rejected by the auctioneer, if, in his judgment, such bid would be likely to affect the sale injuriously.

2. **The highest bidder** shall be the buyer, and if any dispute arise between two or more bidders, the auctioneer shall either decide the same or put up for re-sale the lot so in dispute.

3. **Payment** shall be made of all or such part of the purchase money as may be required, and the names and addresses of the purchasers shall be given immediately on the sale of every lot, in default of which the lot so purchased shall be immediately put up again and re-sold.

Payment of that part of the purchase money not made at the time of sale shall be made within ten days thereafter, in default of which the undersigned may either continue to hold the lots at the risk of the purchaser and take such action as may be necessary for the enforcement of the sale, or may at public or private sale, and without other than this notice, re-sell the lots for the benefit of such purchaser, and the deficiency (if any) arising from such re-sale shall be a charge against such purchaser.

4. **Delivery** of any purchase will be made only upon payment of the total amount due for all purchases at the sale.

Deliveries will be made on sales days between the hours of 9 A. M. and 1 P. M., and on other days—except holidays—between the hours of 9 A. M. and 5 P. M.

Delivery of any purchase will be made only at the American Art Galleries, or other place of sale, as the case may be, and only on presenting the bill of purchase.

Delivery may be made, at the discretion of the Association, of any purchase during the session of the sale at which it was sold.

5. **Shipping**, boxing or wrapping of purchases is a business in which the Association is in no wise engaged, and will not be performed

by the Association for purchasers. The Association will, however, afford to purchasers every facility for employing at current and reasonable rates carriers and packers; doing so, however, without any assumption of responsibility on its part for the acts and charges of the parties engaged for such service.

6. **Storage** of any purchase shall be at the sole risk of the purchaser. Title passes upon the fall of the auctioneer's hammer, and thereafter, while the Association will exercise due caution in caring for and delivering such purchase, it will not hold itself responsible if such purchase be lost, stolen, damaged or destroyed.

Storage charges will be made upon all purchases not removed within ten days from the date of the sale thereof.

7. **Guarantee** is not made either by the owner or the Association of the correctness of the description, genuineness or authenticity of any lot, and no sale will be set aside on account of any incorrectness, error of cataloguing, or any imperfection not noted. Every lot is on public exhibition one or more days prior to its sale, after which it is sold "as is" and without recourse.

The Association exercises great care to catalogue every lot correctly, and will give consideration to the opinion of any trustworthy expert to the effect that any lot has been incorrectly catalogued, and, in its judgment, may either sell the lot as catalogued or make mention of the opinion of such expert, who thereby would become responsible for such damage as might result were his opinion without proper foundation.

3½ and 2¾ inches.

68—TWO TSUBA

Richly enameled with floral cloisons in pink, green and yellow *shippo* on the rare purple or light blue ground. Reverses: Purple and white clouds in blue. Both from same atelier, probably Nagoya, middle nineteenth century.

2¼ inches.

69—CLOISONNÉ ENAMELED TSUBA

Decorated in the *ji-ita* style with crane flying over trees and dragon in the clouds. School of Tokyo, middle of the nineteenth century.

2½ inches.

70—GILT BRASS TSUBA

Decorated with pierced designs of wild geese flying through mist. Period, eighteenth century.

71—IRON TSUBA

Decorated with autumn foliage carved in the metal or enameled in champlevé style in white, green, yellow and pink. Dori-shippo of the end of the seventeenth or early eighteenth century.

72—TSUBA

In copper cover with a *nanako*-skinned surface of lustrous shakudo and richly decorated in relief with birds, flowers and animals in shakudo and gold. Good example of an early eighteenth century guard.

73—TSUBA OF GILT COPPER

Richly decorated with floral rosettes and arabesques in cloisonné enamels (red and dark blue), and further embellished with granules of gold in the style of the Hirata. Probably by the last Hirata, about 1840-68.

74—TSUBA

In copper, covered with a rich *nanako* finish in shakudo and further embellished with relief designs of flying cranes in shakudo and gold. Signed: Yasui-te-nori-tomo. Eighteenth century.

75—T_{SUBA}

In copper, having similar *nanako* ground and shakudo patine. The guard is decorated after Kano designs with designs of kylin and tree peonies in shakudo and gold. Band about edge in electrum (gold and silver alloy).

76—LARGE T_{SUBA}

In copper, covered with a lustrous patine of glossy shakudo, inscribed in gold with felicitous poems, and decorated in gold, silver and copper with designs representing a courtesan writing a billet-doux. Her tragedy is represented by the skull and bones beside a tomb tablet seen on the reverse. A fine guard. Signed: Daigetsuteru. Eighteenth century.

77—T_{SUBA}

In silver, richly decorated in soft but brilliant *dori-jippo* with floral rosettes and arabesques against a ground of translucent *suki-jippo*. The wave design on the reverse is especially fine. By Hirata, about 1850-60. Guard signed: Taira-ta-mata.

Length, 3¼ inches.

SWORD FURNISHINGS, WATER HOLDERS, NETSUKE AND OTHER OBJECTS

78—SWORD FERRULE

In copper, embellished with small diamond medallions in relief by the first (?) Hirata (Donin), about 1646 or by one of his immediate successors of the eighteenth century.

79—FIVE PIECES SWORD FURNISHINGS

In copper, enriched with brilliant but subdued floral designs in enamels of the *dori-jippo* type. Date, about 1838.

80—WATER HOLDER

Decorated with floral rosettes in white and green *ying* pattern on semi-translucent orange ground of thick Korean enamel. End sixteenth or early seventeenth century.

Height, 3¼ inches.

81—WATER POT WITH HANDLE AND SPOUT

Decorated on top with rayed enamel design in green and yellow. Seventeenth century.

Diameter, 2 inches.

82—TWO INK HOLDERS

In bronze, decorated on top with floral and cloud designs in brilliant but age-worn green, blue, yellow and violet. Examples of earliest Japanese (Korean (?)) enamels. Sixteenth or early seventeenth century.

83—TWO BRONZE WATER HOLDERS

Brilliantly enameled with *dori-jippo* floral designs against a brilliant blue ground. Both covers bear imperial kiri crests. Early seventeenth century.

Heights, 2¾ and 2¼ inches.

84—BRONZE WATER HOLDER

Flat circular form, with handle and long slender spout. Its sole decoration consists of a star pattern in semi-translucent orange-colored enamel against a translucent blue ground. Korean enamel, end sixteenth or early seventeenth century, and probably from the Momoyama Palace, in which Korean enameleders did so much work.

Length, 4¾ inches.

85—TWO WATER HOLDERS

Decorated with the *ying-yang* emblems.

86—TWO WATER HOLDERS

Similar to the preceding.

87—TWO WATER HOLDERS

One, in shape of a gourd, possibly dating from the seventeenth century.

2¼ and 1¾ inches.

88—WATER HOLDER

Form upright; mounted on stand. Decorated on both circular faces with rich, thick Korean enamels in spirals or waves of green, orange and white. End of sixteenth to early seventeenth century. Momoyama Palace type.

Height, 2¾ inches.

89—PAIR WATER HOLDERS

Gilt copper and champlevé enamel impressed with mon, or crests, of the *Pawlonia Imperialis*, and having same crests enameled in red, white and turquoise-blue on top. Overhead handles. Earliest Japanese enamel. End sixteenth or early seventeenth century and possibly from Hideyoshi's Momoyama Palace at Fushimi.

Length, 2¾ inches.

90—PAIR WATER HOLDERS

Decorated above with champlevé design of the imperial pawlonia flower, enameled green, white and red. Attributed to Donin or Hirata the First, *circa* 1646.

Length, 2 inches.

91—WATER HOLDER

Of hexagonal form, covered with rich floral *dori-jippo* enamels and bearing impressed marks on cover of the imperial pawlonia or kiri-mon crest. Early seventeenth century.

Width, 2¾ inches; height, 1¼ inches.

92—WATER HOLDER

Of copper gilt, having impressed marks of the imperial pawlonia flower and, on top, rich enamel designs in the style of Donin, the first Hirata. Date, about 1646. Very rare.

Length, 3 inches.

93—PAIR WATER HOLDERS

In brass, embellished with a richly enameled floral bouquet on top in the style of Donin or Hirata Hikoshiro, 1646.

94—TWO WATER HOLDERS

Of copper gilt, decorated in *dori-jippo* with floral designs and diaper pattern. Late seventeenth or eighteenth century.

Length, 2 inches.

95—TWO WATER HOLDERS

Similar to the preceding. Round. One has the crest of the Hojo of Kenchoji, Kamakura.

Diameter, 1 $\frac{3}{4}$ inches.

96—TWO NETSUKÉ

One pewter, one copper, and both decorated with champlévé enamels in green, yellow and blue. Seventeenth century.

97—NETSUKÉ

In wood, with decoration of copper, floral rosette filled in with dull green and yellow enamels of early type. Seventeenth or early eighteenth century.

98—WOODEN NETSUKÉ

Decorated with blue, white and red enamel diaperings in the style of Donin or Hirata the First, 1646. Very rare.

Length, 2 inches.

99—TWO NETSUKÉ

Of bone and bronze, decorated with rich floral cloisonné enamels of the middle eighteenth century.

100—THREE CLOISONNÉ ENAMELED NETSUKÉ

Date, second quarter of the eighteenth century.

101—THREE CLOISONNÉ ENAMELED NETSUKÉ

Nineteenth century.

102—THREE CLOISONNÉ ENAMELED NETSUKÉ

Of best old shippo workmanship. Date, second quarter of the eighteenth century.

First Afternoon

103—THREE CLOISONNÉ ENAMELED NETSUKE

Similar to the preceding.

104—TWO CLOISONNÉ ENAMELED NETSUKE

Possibly early works of Kaji Tsunekichi and exemplifying the earliest rough cloisonwork. Date, second (?) quarter of the eighteenth century.

105—THREE CLOISONNÉ ENAMELED NETSUKE

Of exceptionally good quality and dated to the close of the earlier period just prior to the commencement of the "Ming imitation" period. Second quarter of the eighteenth century. Museum specimens.

106—TWO IVORY NETSUKE

Decorated with cloisonné floral enamels. One, middle eighteenth century; the other attributed to the last Hirata, 1860-68.
